

VALUE OF CDQ QUOTA PER RESIDENT

The graphs below depict the approximate annual “dividend” value of CDQ fish per resident by species. This is the approximate amount a CDQ group can receive by leasing CDQ fish to another party and collecting a lease payment. There is no justifiable reason for this annual CDQ “dividend” for someone in Nelson Lagoon to be more than 10 times greater than someone in Newtok or for a resident of St. Paul to receive 40 times more CDQ halibut than a resident of Mekoryuk. Each CDQ resident within 50 miles of the coast of the Bering Sea should receive the same CDQ “dividend” just like with the Alaska Permanent Fund dividend program.

It is ironic and alarming that St. Paul has a thriving economy with the world’s largest crab processing plant, that Dillingham participates in the world’s largest and longest running wild salmon fishery, that Akutan has the largest seafood plant in North America, and that we have almost nothing economically except the CDQ program, yet we receive substantially less CDQ fish per resident than these other communities.

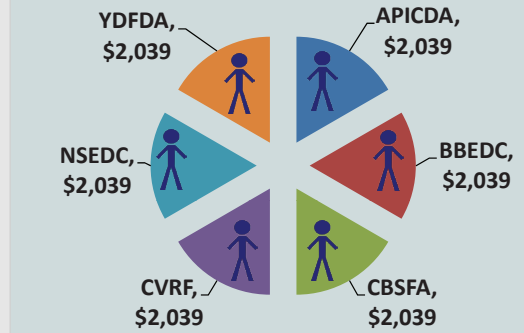

WARNING: You may need a magnifying glass for the graphs below.

CURRENT CDQ FISH ALLOCATION

FAIR CDQ FISH ALLOCATION

POLLOCK

The estimated lease rate value of 2013’s CDQ Pollock is **\$56,970,000**. The left column shows what each resident would get based on the current CDQ pollock allocations. The right column shows what CVRF is pushing for: FAIR CDQ ALLOCATIONS

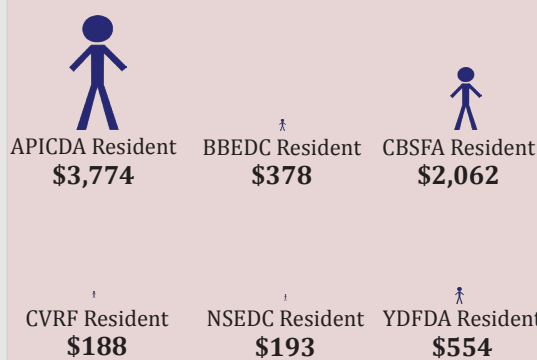

CRAB

The estimated lease rate value of 2013’s CDQ Crab (Red King, Blue, Golden, and Opilio Crab) is **\$12,161,850**. The left column shows what each resident would get based on the current allocations. The right column shows what CVRF is pushing for: FAIR CDQ ALLOCATIONS

COD

The estimated lease rate value of 2013’s CDQ Cod is **\$9,737,000**. The left column shows what each resident would get based on the current CDQ cod allocations. The right column shows what CVRF is pushing for: FAIR CDQ ALLOCATIONS

HALIBUT

The estimated lease rate value of 2013’s CDQ halibut is **\$2,972,550**. The left column shows what each resident would get based on the current CDQ halibut allocations. The right column shows what CVRF is pushing for: FAIR CDQ ALLOCATIONS

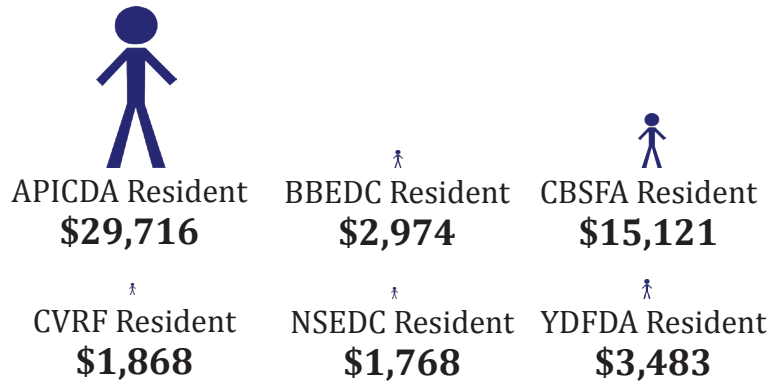

ANNUAL CDQ ALLOCATION "DIVIDEND"

If you would like to help fix this problem, please contact the Alaska Congressional Delegation (Senator Lisa Murkowski, Senator Mark Begich and Congressman Don Young) and ask them to amend the federal CDQ statute so that CDQ allocations are the same per person for everyone living within 50 miles of the Bering Sea coast...

If our residents were receiving our fair share of CDQ fish CVRF could pay even more to our salmon and halibut fishermen, even more to our tender crew and processors in Platinum. We could provide even more People Propel items and at even better prices to our residents. We could invest even more in the Bering Sea for the benefit of our children and grandchildren. Our 20 villages and 9,300 residents are losing more than \$10 million per year in CDQ lease revenue alone because the CDQ allocations have not yet been fixed.

Fix the unbalanced allocations
that give more to other CDQ residents

Combined CDQ pollock, crab, cod and halibut royalty value in 2013

So that all residents benefit equally
